

Articulated Knee Joint

↑ 75 ft Max Mast Extension 🛒 595 lb Max Load Capacity ⌚ 165 ft/min Hoisting Speed

Avario 75 K:

For jobs with sloped roofs, the Avario is available with an articulated knee joint. This feature allows the rails to pivot at the edge of a pitched roof and continue up the slope, giving the lift the ability to hoist materials all the way to the peak.

Available Platforms for the Avario 75 K:

Combination Bucket:

Designed for easy handling of loose materials or debris. Bucket automatically tips at the top of the rail to unload its contents.

Solar Platform:

Platform specifically designed for hoisting solar panels, featuring a clamp and rubber pads to protect the panels from damage.

Universal Platform:

General purpose platform with hinged sides for transport of long materials.
